

Mixed liquor suspended solids measurement with TxPro™-2

The TxPro-2 Transmitter, with a 4-Beam™ RD-240 Suspended Solids Sensor, is used in aeration basins to monitor the mixed liquor suspended solids (MLSS) concentration. The TxPro-2 transmits a current loop signal proportional to the solids concentration to remote control equipment. The controller could use this data to maintain the MLSS loading level.

system sheet

TxPro-2 Transmitter

- Multi-point calibration
- Two separate sensor channels for measurement at more than one location or more than one measuring point
- Two scalable 0/4–20 mA dual-range outputs, galvanically isolated from controller; three user-configurable relays; one purge timer relay; high resolution display
- Complies with CE, UL and CSA requirements
- NEMA 4X (≈ IP66) enclosure
- Panel, wall or pipe mounting is standard with unique universal

mounting bracket

RD-240 Sensor

- RS485 serial communication to TxPro-2
- CPVC (chlorinated polyvinyl chloride) body with 1-1/4" NPT male threads
- Polypropylene measuring fingers with 880 nm IRLED's and silicon photodetectors
- Polypropylene purge tubing (1/4") with reusable polypropylene fittings
- Polyurethane cable; standard length 10 m (33 ft)

Options

- Handrail mounting bracket assembly, quick-release; 713-1119

Ordering Information

System	Voltage	Sensor	Cable Length	Part Number
TxPro-2	90-265 VAC	RD-240 immersion (1 per system)	10 m (33 ft)	6101-2400
TxPro-2	90-265 VAC	RD-240 immersion (2 per system)	10 m (33 ft)	6201-2400

Additional information

Ordering

For additional ordering information, see the *TxPro-2 Suspended Solids Products* section of the price list.

Specifications

For additional product specifications, see these data sheets:

- *TxPro-2 Transmitter (for suspended solids and turbidity sensors)*
- *Series 200 RD Suspended Solids Sensors*

Installation

For additional information on installing your system, see the *TxPro-2 User Manual*
